I was born and raised in Hawaii. Seventeen years of work experience provides me with a strong business background. I have an undergraduate degree in accounting from the University of Hawaii and a MBA from Chaminade University. I currently run my own computer consulting business. I also served as an Officer in the Navy and I hold a commercial pilots license. My work has required me to travel through out the Islands, and I have gotten to know the diverse needs of the people in the Second Congressional district.

I believe that a strong economy is important in meeting the educational and social needs of Hawaii. Although government rules and regulations are necessary, I will diligently work to ensure that government controls are rational rather than excessive and abusive. My opinion is that a balance must exist between the labor force and the business community. A strong business community encourages an economy that requires labor, goods and services. Business and labor must work together. I will work hard for and support legislation that protects labor and rewards entrepreneurs for taking risks. I will strive to bring sustainable jobs to Hawaii and to create a strong diversified economy to the Islands, while protecting our unique culture and environment. Hawaii needs to bring balance to the Congressional delegation. I promise to work hard to fulfill the economic and social needs of the State so please vote for me in the upcoming special election.
